

PROFILE

Software Development student with hands-on experience building **full-stack web** applications and **developing personal projects**. I enjoy solving **real-world problems** using software, writing clean and maintainable code, and continuously improving my skills. Eager to contribute to projects and grow as developer.

TECHNICAL SKILLS

- Languages** — TypeScript, SQL, Java (Fundamentals)
- Frontend** — React, Next.js, Astro, Tailwind CSS, Zustand
- Backend** — RESTful APIs, Node.js, NestJS, Prisma ORM, PostgreSQL, Hibernate, Springboot
- Tools** — Git (branching, clean commit conventions), GitHub, Docker (basic containerization), Linux (bash / CLI basics).
- Soft Skills** — Effective communication, self-directed learning, problem-solving, proactivity, adaptability.

LANGUAGES

Spanish — Native • **English** — B1 (Intermediate)

FEATURED PROJECT

Full-Stack, Multi-Tenant Booking & Scheduling SaaS Platform

2026 – currently

- Built a **multi-tenant appointment management platform** using Astro, React, TypeScript, NestJS, Prisma, PostgreSQL, and Docker, with **tenant roles and access control**.
- Developed a complete booking flow and backend **availability logic**, handling schedules, exceptions, time zones, booking rules, and validation.
- Developed a **notification module** with scheduled notifications, automatic retries, and **multiple delivery channels**, including email, WhatsApp, and in-app notifications, using WebSockets for real-time updates.
- Implemented **authentication** using credentials (email and password) and Google OAuth. For security, I used access and refresh tokens stored in HTTP-only cookies. I also implemented **session management** using JTI, token revocation, and token versioning to invalidate sessions.
- Integrated **Lemon Squeezy** for subscription billing, including upgrades, downgrades, and trial periods.
- Integrated **Cloudinary and Sharp** for image storage and optimization.

GitHub Repositories: [Backend](#) | [Frontend](#) | [Public Web](#)

EDUCATION

Technologist Infomatic

2025 – Expected Graduation 2027

- Coursework in **Relational Databases (SQL)**, **Linux**, Computer Networks (Basic), **Data Structures and Algorithms**, and **Object-Oriented Programming** in C++ and Java.

CERTIFICATIONS

Next.js, Udemy

Certificate

03/2024 – 07/2024

JavaScript, Udemy

Certified

09/2023 – 12/2023
