

PROFILE

Frontend Developer with 2+ years of hands-on software development experience, focusing on **React and TypeScript**. Strong foundation in computer systems, relational databases, and modern web standards. Experienced in **architecting complete user flows**, managing **server and client state** and managing server state with **TanStack Query**. Proficient with **Git workflows**, comfortable with **Linux environments**, and familiar with containerized workflows using **Docker**.

TECHNICAL SKILLS

Languages — TypeScript, SQL, Java (Fundamentals)

Frontend — React, Next.js, Astro, Tailwind CSS, Zustand

Backend — RESTful APIs, Node.js, NestJS, Prisma ORM, PostgreSQL, Hibernate, Springboot

Tools — Git (branching, clean commit conventions), GitHub, Docker (basic containerization), Linux (bash / CLI basics).

Soft Skills — Effective communication, self-directed learning, problem-solving, proactivity, adaptability.

LANGUAGES

Spanish — Native • English — B1 (Intermediate)

- FEATURED PROJECT
- Full-Stack, Multi-Tenant Booking & Scheduling SaaS Platform2026 – currently
- Built a **multi-tenant appointment management platform** using **React, TypeScript, NestJS, Prisma, and PostgreSQL**, with tenant-specific roles and access control.
 - Architected complete booking flows and backend **availability logic**, handling schedules, exceptions, time zones, booking rules, and validation.
 - Developed a **notification module** with scheduled notifications, automatic retries, and multiple delivery channels, including **email, WhatsApp, and in-app notifications**.
 - Implemented **session management with access and refresh tokens, role-based route protection and authorization**, using **TanStack Query** for server-state management and **Zustand** for client-side state.
 - Integrated **Lemon Squeezy** for subscription billing and **Cloudinary** for media management, with development workflows using **Git and Docker**.

EDUCATION

Tecnólogo en Informática2025 – Expected Graduation 2027

- Core technical training in Software Engineering, Relational Databases, Operating Systems (Linux), Computer Networks, Data Structures and Algorithms, and Object-Oriented Programming in C++ and Java.

CERTIFICATIONS

Next.js, Udemy03/2024 – 07/2024

Certificate

JavaScript, Udemy09/2023 – 12/2023
